Ø3.5 x 16 mm

Tavsiye edilen vida:
Recommended screw:

Teknik Ölçüler / Technical Dimensions

Kapak Kalınlığı Door Width	T
16 - 18 mm	5 mm
19 - 22 mm (Geniş Alüminyum Kapak) (Wide Aluminium Door)	3 mm

F: Fuga

T: Tas Mesafesi - Cup Distance (3 - 6mm)

S: Tavan Kalınlığı - Cabinet Ceiling Thickness

$$S = T + F + 13$$

Not: Ölçüler mm cinsindendir.

Note: Unit of measurement is millimeter.

Tek Raf Uygulaması Single Shelf Application	
Kabin Yüksekliği Cabinet Height (mm)	B mesafesi B Distance (mm)
1040	383
1000	366
900	310

İŞLEM
STEP 1

İŞLEM
STEP 2

**İŞLEM
STEP 3**

- 1 Vidayı gevşetin.
Loosen the screw.
- 2 Teleskopik kol üzerinde bulunan delik numaralarına* göre gerekli kol uzunluğu ayarını yapınız.
Please make sure to set the proper length for telescopic arm by following hole numbers* which are stated on telescopic arms.
- 3 Vidayı sıkıp sabitleyiniz.
Tighten and fix the screw.

*Uygun delik pozisyonları için tabloya bakınız.

*Please refer to the hole position table for correct hole position.

Tek Raf Uygulaması Single Shelf Application		
Kabin Yüksekliği Cabinet Height [mm]	Kol Boyu Arm Length [mm]	Delik No Hole Number
1040	345	10
1000	345	8
900	345	1
860	345	0
800	237	8
760	237	6
720	237	3
700	237	2
650	195	4
600	195	1
560	145	5
500	145	1
480	145	0

Simetrik İki Raf Uygulaması Symmetric Double Shelf Application		
Kabin Yüksekliği Cabinet Height [mm]	Kol Boyu Arm Length [mm]	Delik No Hole Number
900	345	1
800	237	6
720	237	1

Not: Kullanım esnasında vidada gevşeme görülürse uygun pozisyona getirerek sıkınız.

Note: If the screw is loosened during use, tighten it by bringing it to the appropriate position.

**Önemli:**

Doğru delik numarasını tespit etmek için kol profilinin kesitini hizalayınız.

Important:

For setting the correct hole number on telescopic arms, please do the alignment by using the profile edge.

Not: Tabloda belirtilmeyen kabin yükseklikleri için bir üst satırdaki ölçüler kullanılarak montaj yapılabilir.

Note: For the cabinet height which is not specified in the table, installation can be done by using the information that is stated in the upper row of the closest dimension to your cabinet height.

**İŞLEM
STEP 4**

Kol profilini mekanizmaya yerleştirin.
Place the arm to the mechanism.

Sabitleme vidasını sıkın.
Tighten the fixing screw.

Dikkat / Caution

Dikkat: Mekanizma kolu yukarıya fırlayarak yaralanmalara sebep olabilir.

Caution: Lever arm can spring up and cause injury.

STEP 7

İŞLEM
STEP 8

İŞLEM
STEP 9

**İŞLEM
STEP 10.A**

Alttağı parçayı, aralık (X) kapanıncaya kadar yukarı doğru itiniz.
Push the lower part up until the gap (X) is closed.

**İŞLEM
STEP 10.B**

Kapakları bastırarak kapatınız.
Close the doors by pressing.

**İŞLEM
STEP 10.C**

Kapakları tekrar açınız.
Reopen the doors.

**İŞLEM
STEP 10.D**

Bu iki parça biraz aralanacaktır.
Vidayı tornavida ile aralık kapanıncaya kadar sıkınız.
There may be small gap between these two plastic parts,
tighten the screw with screwdriver until the gap is closed.

**İŞLEM
STEP 10.E**

Kapakları tekrar kapatın, ayarın
tamamlandığını göreceksiniz.

Close the doors again, arm adjustment
must have been done on this step.

**İŞLEM
STEP 10.F**

Kapakları tekrar açınız.
Reopen the doors.

Yapılan ayarı sabitlemek için vidayı tornavida ile sıkınız.
Make sure to tighten the screw to fix the arm adjustment with screwdriver.

Üst Menteşe / Top Hinge

Ara Menteşe / Middle Hinge

Mekanizmanın gücünü arttırmak için pozitif yönde çeviriniz.
Mekanizmanın gücünü azaltmak için negatif yönde çeviriniz.

**For increasing the power of the mechanism, please make the adjustment on positive direction.
For decreasing the power of the mechanism, please make the adjustment on negative direction.**

- 1** Damper emniyet pimini çıkarınız.
Take out the damper safety pin.

UYARI
IMPORTANT

Şarjlı matkap ile ayar yapmayınız.
Do not make the adjustment with a power
screwdriver or a power drill.

2

Negatif yönde ayar yapıldığında kapak kapanma hızı artacaktır,
pozitif yönde ayar yapıldığında kapak daha yavaş kapanacaktır.

Adjustment on negative direction ensures faster door closing effect,
adjustment on positive direction ensures slower door closing effect.

3

Damper emniyet pimini takınız.
Place the damper safety pin.

Damper emniyet pimini takarken işaretli alan içerisinde kalacak
şekilde uygun yerden takınız.

Please pay attention to the arrow sign for placing the damper
safety pin.

90 derece açılma açısı için öncelikle kapağı 90 derecenin altına gelecek şekilde indiriniz ve tornavida ile ok yönlerine doğru çevirerek kapağın açılma açısı için pimlerin tercih edilen açığa gelmesini sağlayınız.

Please make sure to place the pins on the preferred opening angle.

For 90 degree opening, please lower the doors below 90 degree angle and then turn the screw towards 90 degree direction.

For 110 degree opening, please turn the screw towards 110 degree direction.

Önemli Not: Kapak açılma açısı ayarını yapmak için PZ2 uçlu tornavidayı kullanınız.

Important Note: Please make the opening angle adjustment with a manual screwdriver with a #2 Pozi drive tip.
